
PBMC | Differential pathway enrichment
Each group vs the mean log expression of the other two; paired subject + group model
GO:0071347, cellular response to interleukin-1
GO:0048020, CCR chemokine receptor binding
GO:0002685, regulation of leukocyte migration
GO:0006935, chemotaxis
hsa04151, PI3K-Akt signaling pathway
GO:0097529, myeloid leukocyte migration
GO:0002274, myeloid leukocyte activation
GO:0017017, MAP kinase tyrosine/serine/threonine phosphatase activity
GO:0030296, protein tyrosine kinase activator activity
GO:0097696, cell surface receptor signaling pathway via STAT

Count = pathway-overlapping DEGs, combining up- and downregulated genes; enrichment does not imply activation.
Filled = ORA BH-adjusted P < 0.05; hollow = not significant; x = zero overlapping DEGs.
DEG: gene-level BH P < 0.05 and |log2FC| >= 1. ORA BH correction covers all eligible sets and all three contrasts.
